

ABOUT ME

I am an individual with a strong interest in cybersecurity, information technologies, and software development, actively conducting research on network security, vulnerability analysis, and blockchain technologies. I am highly motivated to learn and continuously explore emerging technologies, staying up to date with industry trends and best practices. Through my involvement in clubs and hands-on projects, I have strengthened my problem-solving skills and developed a mindset focused on combining theoretical knowledge with practical application.

EDUCATION

Elazig	Firat University	09/2022 – 09/2026
B.S. in Digital Forensics Engineering (CGPA: 3.60)		

WORK EXPERIENCE

Istanbul	Istanbul Airport (IGA)	03/2026 - Present
- Associate Cyber Security Analyst - Monitored and correlated security events via Splunk SIEM, identifying threats and anomalies across critical airport infrastructure. - Orchestrated incident response workflows using Cisco XSOAR, reducing triage time and accelerating threat containment. - Investigated and remediated endpoint threats through Cisco AMP. - Managed email security by detecting and responding to inbound phishing and malicious emails using Cisco ESA and Beamsec.		
Istanbul	OnBT Kalyon Holding	09/2025 – 01/2026
- SOC L1 Intern - Real-time monitoring and analysis of security incidents using IBM QRadar and TrendVision One platforms - Detection, classification, and escalation of threats such as phishing, malware, and intrusion attempts - Support in vulnerability management, incident response, and threat analysis workflows - Performed rule tuning and basic rule adjustments to reduce false positives.		
Istanbul	Turkish Technology	07/2025 – 08/2025
- Network Management Intern - Contributed to the analysis and evaluation of security architectures within the corporate network infrastructure. - Participated in Proof of Concept (PoC) studies for the protection of critical systems. - Assisted in detection, classification, and reporting of security incidents using SIEM solutions.		

PROJECT AND ACHIEVEMENTS

Firat University Science Journal	ICAIE 2025	09/2025
- Developed a high-performance spyware detection study named “High-Performance Spyware Classification with Wavelet Transform Features.” - Accepted for publication in the proceedings of the 3rd International Conference on Advances and Innovations in Engineering (ICAIE 2025), held at Firat University, Turkey. - Applied network traffic analysis using Daubechies wavelet transform features and a Decision Tree classifier. - Achieved 97.06% detection accuracy, demonstrating strong effectiveness for network monitoring and threat prevention.		

Batman University Science Journal	IIC 2024	05/2024
- Developed a real-time human identification study named "Real-Time Human Recognition with Random Forest Algorithm Using Gait Biometrics Images." - Published in Bartın University Science Journal and presented at the International Informatics Congress (IIC 2024) in Batman, Turkey. - Implemented a Random Forest–based classification model to analyze gait biometrics and motion patterns extracted from biometric images, achieving high-precision identification. - Addressed key challenges in non-intrusive human identification by proposing a lightweight and reliable approach applicable to surveillance, security, and smart systems.		
Cyber MAIN	HAVELSAN HACKATHON	04/2024
- Developed a next-generation intrusion detection system idea named "Cyber MAIN" for Havelsan's artificial intelligence platform MAIN within a 26-hour timeframe during the Havelsan Hackathon. - Achieved 3rd place out of approximately 40 competing teams in the hackathon competition. Leveraged knowledge in team collaboration, creative thinking, cybersecurity, artificial intelligence, active learning		
Forensic Project	TÜBİTAK Project	01/2024
- The project titled "Development of Person Identification Algorithms using Gait Biometrics from Security Cameras for Forensic Cases" has been selected as a semi-finalist in the TÜBİTAK competition. Leveraged knowledge in team leadership, analytical thinking, scientific research, image processing		

VOLUNTEER WORKS

SGT Club – Chairman (2023–2025) | **Cyber Anatolian Communities** – Event & Organization Coordinator (2023–2025) | **Google Developer Student Club** – Core Team Member (2023)

COURSES

- Introduction to Cyber Security 101, 24 hours program, certificated by Turkcell, 03.2023
- Introduction to Cybersecurity, certificated by Cisco, 12.2023
- CCNA: Introduction to Networks, certificated by Cisco, 01.2024
- Certified Network Security Practitioner (CNSP), certificated by The SecOps Group, 07.2025

SKILLS

- CS Hard Skills:** Google Dorking(Intermediate), Web Analysis, Security Analysis, Cryptography, Reverse Engineering (Basic), Social Engineering, Network Forensics (Basic), Kali Linux
- Programming:** C (Intermediate), Flutter(Beginner), Python(Beginner), C++(Intermediate), C#(Beginner)
- Interests:** Ctf competition, Cyber Security, Content creation
- Language:** Turkish(Native), English(B1)
